Jhapa, Nepal

Professional Summary

Software Engineering student seeking Frontend and Backend development opportunities. Strong foundation in JavaScript-based technologies including React.js and Node.js, with hands-on experience building full-stack applications. Familiar with RESTful APIs, relational and NoSQL databases, and modern web development practices. Comfortable working with Git/GitHub and collaborative development environments.

Technical Skills

Programming Languages: JavaScript, HTML, CSS

Frontend: React.js

Backend: Node.js, REST APIs

Databases: PostgreSQL, MongoDB, MySQL

Tools: Git, GitHub

Education

Nepal College of Information Technology (NCIT) 2021 – 2026 (Expected) Bachelor of Software Engineering CGPA: 3.5 (Till Now)

Academic & Personal Projects

DebunkAI React.js, FastAPI, PostgreSQL Developed an application to differentiate between AI-generated and real images. Integrated a RESTNet50 machine learning model via REST APIs. Focused on frontend-backend communication, model integration, and database management.

SmartSocial Node.js, React.js, PostgreSQL Built a unified platform integrating multiple social media services such as Facebook, Messenger, Instagram, and Twitter into a single interface. Worked on backend logic, API handling, and responsive frontend design.

Authentication & Backend Projects Node.js, Databases Implemented multiple login and signup systems focusing on backend logic, user authentication, and secure data handling.

Activities & Experience

- Participated in hackathons and technical workshops related to frontend and backend development
- Experience working on team-based projects using Git and GitHub
